

COME CURIOUS.

REDHAWK BUILDS

A FINTECH BUILD WEEKEND.

NOV 6-8, 2026

McVey Data Science Building

POSITIONING

MAKE IT ABOUT THE WEEKEND.

A student should know what this is, who belongs, and why to come before they notice a finance reference.

01 A real thing to make

A working demo, built around a fintech problem.

02 People worth meeting

Business, data science, and CS in the same team.

03 A place to start

Education first. First-time builders welcome.

NEW TYPOGRAPHY

LOUD HEADLINES. HUMAN COPY. BARLOW CONDENSED EXTRABOLD

ABCDEFGHIJKLM 0123456789 \$

DM Sans

Regular / SemiBold

Body copy, dates, logistics, and short labels. Readable language with enough size to survive a phone screen.

Barlow Condensed replaces the former mono headline system. Its compact width gives the event name scale without reducing the supporting details to tiny labels.

Use display type for major prize figures. Use DM Sans for everyday numbers. JetBrains Mono is no longer part of this campaign kit.

Never color a number red. Green is money, not decoration. White is the dark-mode text utility.

IDENTITY HANDLING

THE NAME DOES THE WORK.

The image shows a dark gray rectangular box containing the text 'REDHAWK BUILDS' in a large, bold, white, sans-serif font. The text is stacked in two lines, with 'REDHAWK' on top and 'BUILDS' below it. The letters are thick and have a slightly irregular, hand-drawn feel.

CAMPAIGN TITLE TREATMENT

Use the full event name first.

This is a typeset campaign title, not a recreation of the missing primary logo. Keep its two lines aligned left and give it clear space.

Keep \$RHB as a signature.

The ticker belongs in a footer, supporting label, or finance-specific application. The opening price remains 18.09. It does not need to lead every asset.

Supplied logos remain untouched. No Miami M, RedHawks, Farmer, AWS, or host marks are invented.

EXPLAIN

Give the weekend a simple rhythm.

COPY & ENGAGEMENT

GIVE THEM A REASON TO CARE. FIRST HACKATHON?

You don't need a finished idea.

You don't need to be a CS major.

SAY WHAT THEY GET

A team, a fintech problem, a learning day, and time to build a working demo. Concrete details beat promises about changing the world.

MAKE THE NEXT STEP CLEAR

Use one registration action: Typeform. Pair feed posts with a working bio link and stories with a native link sticker. Luma RSVP is not registration.

Judge engagement by completed registrations and useful replies. These designs are a stronger direction, not a guarantee of performance.

PHOTOGRAPHY & GRAPHICS

REAL PEOPLE. REAL WORK.

WHEN PHOTOS ARE AVAILABLE

Use permission-cleared photos of Miami students discussing a problem, building together, or showing a demo. Prioritize faces, hands, and something being made.

UNTIL THEN

Use strong typography. Do not pass generated event photos, fictional rooms, or generic desk still lifes off as this community.

A SHOT LIST FOR THE EVENT

A team explaining an idea to each other.

A close view of a real working demo.

Friday learning: speaker and audience.

A pitch with people listening.

A wide room photograph with energy.

The supplied campus thumbnail is too small for a full-size campaign photo. Request its original rather than enlarging it.

RELEASE CHECK

MAKE IT READY. THEN SHARE.

TYPE	Barlow Condensed ExtraBold + DM Sans. No mono-heavy headlines.
FACTS	Nov 6–8, 2026. McVey. Miami students. Teams of 3–5.
COLOR	No red numbers. Green money only. Paper only in light/print.
LOGOS	Original artwork only. Never imply an unconfirmed sponsor.
LINKS	Connect the Typeform CTA. Add the actual story link sticker.
QUALITY	Check phone-size readability, platform crop, and image alt text.
OPS	Devpost for submissions; GroupMe for event operations.

This revision applies to the brand guide and campaign images only. The live website remains unchanged. Original logo files and final registration links are still pending.
